

## Embedment puck fixture

---

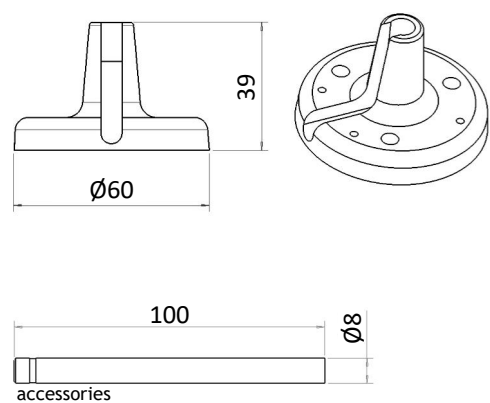

The embedment puck is developed to enable quick and easy mounting and fixing of the acrylic standoff in the right 90° angle in concrete, rubber, pebbles, rubbles and even in grass.

Mount the puck nice and easy and make everything ready for the fibre harness.

The embedment puck is without metal parts and therefore corrosion resistant.

## Embedment puck fixture

- For indoor and outdoor use
- for embedding in concrete floors
- 4 different fibre size Ø1-1.5-2-3 mm

## Embedment puck fixture

Size	Ø60 x 39 mm
